Contents

1) System Requirements & Built
2) Deployment
3) Using Investment R$_{deep}$

1) System Requirements & Built

i. Application is built under Windows 10 Pro OS
ii. Python 3.7.6
iii. tensorflow 1.13.2 / tensorflow.keras
iv. Packages

1)	-	GUI	: tkinter
2)	-	Data and system related	: yfinance, os, sys, sqlite3, importlib, datetime
3)	-	Numbers	: pandas, numpy
4)	-	Plots and Images	: matplotlib, PIL
5)	-	Stats related	: sklearn, scipy, statsmodels
6)	-	Sound	: gtts, getpass, playsound

v. Download Investment_Rdeep.zip

2) Deployment

i. Allow python to run from CMD.
i.e. Windows OS: System properties -> Environment Variables -> Path -> Edit environment variable (Python path required)
ii. Unzip Investment_Rdeep.zip to any preferred location.
iii. Click on ird.bat to start.

3) Using Investment R$_{deep}$ – User Interface

- ➢ No. 0, **Input boxes**:   Allow input stock symbol / stock path
- ➢ No. 1, **Auto / Manual**:   Auto to query stock symbol to Python – yfinance
           Manual to open .csv
- ➢ No. 2, **Run**:   Run the model stated in the frame
- ➢ No. 3, **Latest Rpt**:   Open pdf report
- ➢ No. 4, **Refresh / Adv Setting**:   Resets models' results, calls advance setting window

- ➢ No. 4.1, **Input boxes**:
  Enter values
- ➢ No. 4.2, **Confirm Change**:
  Click to commit
  change in 4.1
- ➢ No. 4.3, **Toggle**:
  'On' for FFT auto
  suggest, 'Off' to
  remain manual
- ➢ No. 4.4, **Readme**:
  Opens txt readme
- ➢ No. 4.5, **Default**:
  Apply default
  settings (*Note =
  Toggle will be on)
- ➢ No. 4.6, **Readme**:
  Clears caches and
  by-products, mini
  reset
